

## A Nyughatatlan RIDER

The band can give a mixed L-R signal to the sound engineer for PA. Our sound engineer mix on a digital mixer (soundcraft ui 24 R), which is controlled by a tablet. We use our own microphones, monitors, so we need an empty stage, and 6 x 230 V (RIDER).

We need:

1. Empty stage
2. 6 X 230 V (Rider)
3. 3 SM58 microphones + stand
4. 2 microphone stands
